

PRODUCT INFORMATION

Designed for steep, sloping hillsides and other structural challenges, the Vertica Pro[®] retaining wall system can be built to virtually any height in incredibly tight spaces – thanks to an impressive 4-degree batter, built-in alignment locators, and a near-vertical rise for less excavation and land loss. Typically used with geosynthetic reinforcement, Vertica Pro blocks meet or exceed industry standards for strength and durability.

- Pinless, patented locator lug gives quick, uniform setback for reduced labor costs
- Used in commercial-site development or anywhere space is at a premium
- Warm earth-tone colors and rugged, rock-like texture
- For gravity wall applications, the Vertica Pro system, with its deeper design, can accommodate walls up to approximately 6 feet high, including buried course
- Taller walls can be built using geosynthetic reinforcement or the AnchorplexTM retaining wall system when designed by a qualified engineer

Straight Face

- Minimum outside radius, measured on the top course to the front of the units: 8 feet, 6 inches
- Minimum inside radius, measured on the base course to the front of the units: 5 feet, 6 inches

Beveled Face

- Minimum outside radius, measured on the top course to the front of the units: 5 feet, 6 inches
- Minimum inside radius, measured on the base course to the front of the units: 8 feet
